

AED and CPR Training Opportunities

Dolton West Elementary District 148 takes seriously the health and safety of all students and staff members who are on school premises. All District 148 schools are equipped with Automated External Defibrillators (AEDs) and staff members have been trained in the use of these devices. Opportunities also are made available each school year to staff to receive Cardiopulmonary Resuscitation (CPR) and AED training. In addition, the Illinois High School Association has on its website a training video on hands-only CPR and AEDs. Parents and staff are encouraged to view this video. If you have a Windows-based device, you can watch the video by clicking on the following link: http://www.isbe.state.il.us/asx/2012/Hands_Only_CPR_081312.asx
